

# ANGLECOM

**AngleCom** is a fast, cost-effective way to monitor your own alarm - 24/7.

## What is AngleCom?

**AngleCom** is a small communicator installed in your home which instantly alerts you, wherever you are, when your alarm activates.

## How does it work?

**AngleCom** is programmed with your mobile phone number and installed in your home by one of our qualified technicians. Should your alarm activate **AngleCom** sends a text to your mobile phone letting you know that you have an alarm activation.

## Features of AngleCom

- Small unobtrusive unit the size of a light switch
- Programmed on site
- Instant text to three mobile phone numbers
- No landline required
- Based on top-up & bill pay mobile phone technology
- Works on all mobile networks
- 24 hour back-up service
- 12 month guarantee on equipment
- Extended warranty options available

## How it benefits you!

- It's Free once you own it - there are no ongoing monitoring fees
- Flexible payment options - pay in full or make regular payments
- Cheap – messages cost the price of a text message
- Peace of mind - you will know instantly if your alarm goes off
- No need to rely on neighbours to tell you if your alarm goes off
- You can deal with the problem, wherever you are, as soon as you get the text

## How much does it cost?

From as little as **€10** per week over 1 year
